the book continues with an experimental analysis conducted to obtain accurate and complete information about electric vehicles in different traffic situations and road conditions for the experimental analysis in this study three different electric vehicles from the edinburgh college leasing program were

equipped and tracked to obtain over 50 gps and energy consumption data for short distance journeys in the edinburgh area and long range tests between edinburgh and bristol in the following section an adaptive and robust square root cubature kalman filter based on variational bayesian approximation and huber s m estimation is proposed to accurately estimate state of charge soc which is vital for safe operation and efficient management of lithium ion batteries a coupled inductor dc dc converter with a high voltage gain is proposed in the following section to match the voltage of a fuel cell stack to a dc link bus finally the book presents a review of the different approaches that have been proposed by various authors to mitigate the impact of electric buses and electric taxis on the future smart grid

this book highlights the latest advancements in the planning and operation of plug in electric vehicles pev in depth the book presents essential planning and operation techniques to manage the pev fleet and handle the related uncertainties associated with the drivers behavior several viewpoints are presented in the book ranging from the local distribution companies to generation companies to the aggregators problems such as parking lot allocation and charging management are investigated taking into consideration the technical geographical and social aspects in a smart grid infrastructure discusses the technical specifications of electrical distribution and generation systems models drivers behavior from the sociology and economic points of view considers the real geographical characteristics of area and driving routes in san francisco ca us chicago il us and tehran iran

this edited volume presents new insights and challenges in the field of electric mobility in relation to new mobility and infrastructure concepts as well as to renewable energies the book covers the socio economic view on the topic as well as technical aspects and thus offers valuable knowledge for future business models it primarily addresses practitioners and researchers in the field but may also be of use to graduate students

who manufactures cereal for kellogg s why are the mercedes smart and the renault twingo almost identical do danone and nestlé really manufacture everything they make us believe they manufacture is zara an opaque or a transparent brand why do some companies claim we do not manufacture for other brands when yet they hide from us the fact that sometimes other brands manufacture for them the number of companies outsourcing the whole of their production for their brands in an opaque manner is constantly increasing while they disregard the legitimate need for information and communication of the general public and consumers paradoxically in this age of transparency opacity is ever growing among well known brands in every industrial sector black brands in the age of transparency is an extraordinary piece of work on truths and lies on transparency and opacity of leading companies and brands in our age the book is full of relevant cases never discussed before in sectors such as consumer products baby foods fashion vehicles and mobile phones insightful and incisive fernando olivares has directed his team to produce this book that will educate us as citizens and consumers their goal is to promote honest transparency the only way to attain corporate legitimacy and sustainability in our time

on american energy and its persisting power to destroy in the united states the promise of a green energy future is complicated by its realities the country s legacy energy systems are decrepit the rollout of new technologies is unequal and piecemeal households find themselves increasingly without reliable or affordable access and americans are excluded from the decisions that shape their energy futures having power in america has become an exercise in race class and wealth in more ways than one power lines is a sweeping portrait of american energy in the twenty first century rendered in terms of its increasing and inevitable human costs coal miners in west virginia lose their livelihoods as energy markets change historically marginalized households cannot easily access new technologies children in sacrifice zones adjacent to mineral mining sites suffer health problems and limited resources and cities and towns are burdened from the production of alternative energies sanya carley and david konisky show current challenges and an uncertain future of

america's greatest policy imperative the result is not only sobering but also essential for planning and pursuing a clean energy transition that improves on the errors of the past

a funny moving travelogue following in the footsteps of hans christian andersen without hans christian andersen there would be no alice in wonderland no roald dahl and maybe even no harry potter and he has outsold them all but few realise that the man who invented children's literature was also a pioneering travel writer having been dragged against his will to live in denmark michael booth discovered one of the great secrets of travel literature andersen's a poet's bazaar a fascinating travelogue through a europe on the cusp of revolution by an author who though a genius was clearly a towering neurotic and proto drama queen he discovered too his chance to escape denmark in 1840 andersen was also desperate to flee writing as he sailed it is just as well i am leaving my soul is unwell in germany he was enraptured both by steam travel and the fiery franz liszt
